

Vehicle Specific Clutch Kit Installation Notes

TBC82

Relates to: Standard Replacement Flywheels

Background:

To ensure this standard replacement flywheel is correct for this application, in addition to referring to the CI catalogue or CI customer service agent please perform the following check against your original flywheel.

Perform following check before installation:

1. Insert the flywheel bolt into the original flywheel
2. With a vernier caliper measure the length of the bolt protruding through to the crank side of the flywheel
3. Do the same process with the new replacement flywheel
4. Both measurements should be the same. If there is any variance, please call CI customer service on 1300 369 787
